2160 Lab 6 Report

Patrick Taylor and James Wachala

Section Number: 1

February 27th, 2019

Pre-lab

Files are attached on Blackboard.

Assignment 1

The code in `gpio-init.sh` reads the addresses of the servo pins and allows them to be written to via PWM. The unexport lines remove the previous exported gpio pins value. The export lines put dow nthe new export value. The direction lines put all the pins as output.

Assignment 2

Files are attached on Blackboard.

Assignment 3

Files are attached on Blackboard.

Assignment 4

Files are attached on Blackboard.
